RE: SMP Data Communications 25-year warranty

To Whom It May Concern:

The SMP Data Communications' Performance 25-year Channel / Link Limited Warranty certifies that all SMP passive copper and fiber connectivity hardware and cable provided by an SMP approved cable vendor, that has been installed by a Multi-media Design and Installation Specialist (MDIS), will support applications designed for data transmission over the applicable channel link as defined in TIA/EIA-568-B specifications, will meet or exceed the electrical requirements of TIA/EIA-568-B and ISO/IEC IS 11801 for passive cabling channels, and that these components will perform to specifications and be free from defects in material and workmanship for at least 25 years from the date of purchase.

All approved cable vendors are thoroughly evaluated and verified by SMP to industry requirements, standards compliance and SMP's own elevated performance criteria. SMP has found the listed cables to be within industry specifications and has approved their usage with SMP copper connectivity towards application of an SMP Performance 25-year Channel / Link Limited Warranty:

ABA Approve Riser Rated Products

TUR2404N09xx, 4pr Category 5e, ELITE 350MHz
TUR2404N70xx, 4pr Category 6, ELITE 400MHz
TUR2404N70xx-S, 4pr Category 6e, ELITE 600MHz
TUR2304S03xx, 4pr Category 6a, ELITE 10G

ABA Approved Plenum Rated Products

TUP2404N09xx, 4pr Category 5e, ELITE 350MHz
TUP2404N70xx, 4pr Category 6, ELITE 400MHz
TUP2404N70xx-S, 4pr Category 6e, ELITE 600MHz

Each warranty application is carefully reviewed and evaluated on a case-by-case basis for qualification. Along with the application, actual test data and a possible site inspection by an SMP representative must be submitted and completed before an approved warranty certificate will be issued. If you have any further questions, please contact Sue Lindner, SMP's MDIS & Warranty Administrator.

Sincerely,

Heather Johnson
